

4th March 2021

Dear Parent/Carer

Flexible return to education - next steps

On March 3rd 2021, Welsh Government released their latest guidance for pupils returning to school settings. With COVID-19 case rates falling across Wales, we welcome the opportunity to allow education settings of secondary school aged pupils to start to open more fully from the 15th March.

Initial Welsh Government guidance gave educational leaders the ability to open for exam pupils only. In addition, this latest guidance allowed for some flexibility in other year groups in specific circumstances.

Headteachers across Wrexham have met to discuss this flexible return to education for secondary aged students. We recognise that each educational setting will have specific factors it will need to consider regarding timings, staffing and current safety measures in place on sites. However, the general principles across education settings of secondary school aged pupils in Wrexham will be:

- Maximum time and resources on site will be provided to examination years during the two weeks beginning 15th March.
- Key stage 3 learners will be offered the opportunity to check-in with school and to return to school for some time during the two-week period leading up to the Easter holiday.

To ensure that this return considers the safety and welfare of learners and staff, individual schools will confirm school-specific details on Monday 8th March.

We are looking forward to this flexible return to onsite learning in our secondary settings from March 15th.

Thank you for your continued support.

Mr A Brant
Headteacher
